About This Software

Float is a software that allows you to display 3D models on your desktop, with Steam Workshop support. You can use it to make 3D models dance on the desktop, show your favorite game models, pictures and so on.
Float provides a Unity plug-in that allows you to create and upload models to creative workshops through Unity3D.

Float is now in "Early Access". Its functions are not perfect enough. There are still some problems to solve and features to be extended.
So if you have any problems, or any suggestions and ideas, please contact me.

Features in plan:
More interactive effects, such as clicking on the character's body, gives different feedback.
Add some mini desktop games.
MMD dancing models.

I would appreciate if you could help me translate Float, please send me email.
My mail: 1534921818@qq.com

. **Patch Released - Mouse ScrollWheel Updates, Fixes**:
Patch Released - Mouse ScrollWheel Updates, Fixes.. **Patch Released - Float Editor Updates, Fixes**:
Float Editor will now automatically check for updates when launched in Unity. I suggest that you should alwalys use the newest version of it.

Some fixes include:
1. Subscribed models now can play when Steam client offline.
2. Mouse interactions with models are available on Windows 7.
3. The problem that sometimes a "loading" effect never appears on Intalled page.. :
1.
2.
1.
2. . **Quick update**:
1.Fix the bug that you cannot play a workshop item when installed.
2.Support more languages.. **Version3.3.2 released**:
Version 3.3.2 main content:
1, The berserkers in mini game can automatically fight
2, New model, the new action
3, The right-click menu of models
4, Fix some problems
5, Update the shop videos, pictures
. **Patch Released - Updates, Fixes**:
Updates:
1.Larger range of transparency in settings
2.Transparency toggle in system tray menu

Fixes:
1.Failed to load model settings when start with windows
2.System tray menu blocked with top most model.. **Float 2.0.0 Released**:
Float 2.0.0 Released
The most important thing is to replace the old window location system with desktop coordinate system.

Beginning with this version, movement interaction in desktop screen coordinates will be implemented.
